

# NCAA Scoring Analytics

Southeastern Louisiana Lions, 2016/2017

## Points Per Minute Benchmark

### Position Insights

C

Highest scorers per minute (0.484 P50).

PF

Strong scorers (0.400 P50).

NA

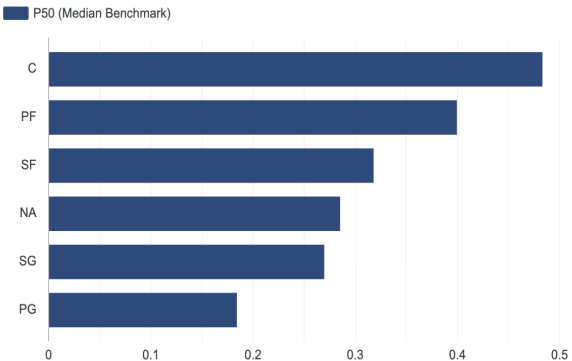

General pool benchmark (0.286 P50).

PG

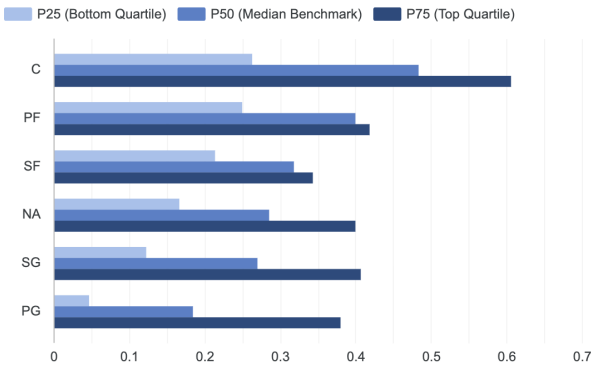

Lowest PPM (0.185 P50).

| 6. | PG       | 22            | 0.05                  | 0.18                     | 0.38               |

NA position group (13,319 players) represents the operative benchmark for Southeastern Louisiana Lions analysis

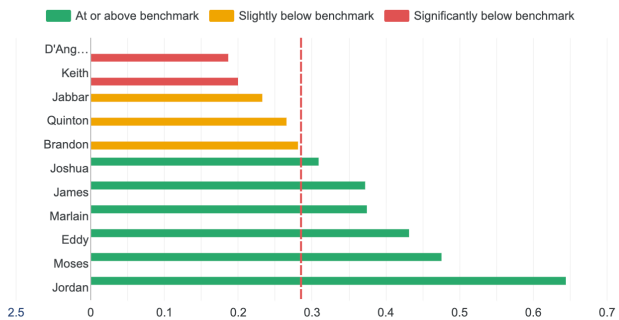

# Southeastern Louisiana Lions, Player Performance vs Benchmark, 2017 Season

Benchmark P50 = 0.2857 PPM

Compa Ratio by Player

Points Per Minute Vs Benchmark

## The Pay Compensation Analogy

The compa ratio directly mirrors pay compensation analytics:

**< 0.80** Significantly underperforming  
*Needs immediate coaching intervention or replacement*

**0.80–0.99** Slightly below benchmark  
*Targeted development plan*

**1.0** At benchmark  
*Performing as expected for their position*

**> 1.0** Above benchmark  
*High performers*

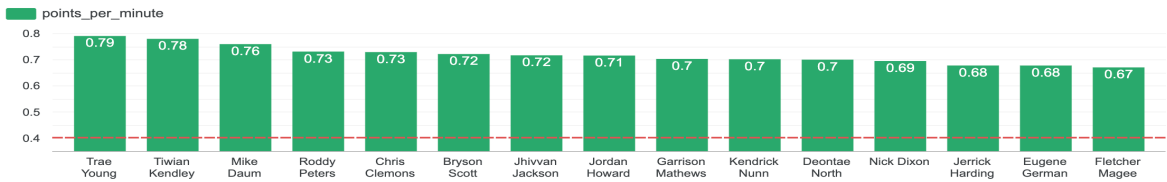

Just as a compensation analyst reviews employee pay against the market midpoint, we benchmark each player's scoring output against their position peers. D'Angelo West at 0.65x would be the equivalent of an employee paid 35% below market.

## Full Squad Compa Ratio Analysis

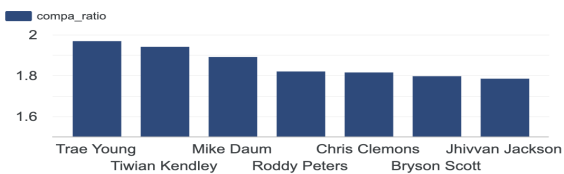

|     | Player           | Band                          | Total Points | Total Minutes | PPM  | Benchmark P50 | Compa Ratio |
|-----|------------------|-------------------------------|--------------|---------------|------|---------------|-------------|
| 1.  | D'Angelo West    | Significantly below benchmark | 26           | 139           | 0.19 | 0.29          | 0.65        |
| 2.  | Keith Charleston | Significantly below benchmark | 128          | 639           | 0.2  | 0.29          | 0.7         |
| 3.  | Jabbar Singleton | Slightly below benchmark      | 188          | 806           | 0.23 | 0.29          | 0.82        |
| 4.  | Quinton Thomas   | Slightly below benchmark      | 58           | 218           | 0.27 | 0.29          | 0.93        |
| 5.  | Brandon Gonzalez | Slightly below benchmark      | 40           | 142           | 0.28 | 0.29          | 0.99        |
| 6.  | Joshua Filmore   | At or above benchmark         | 256          | 827           | 0.31 | 0.29          | 1.08        |
| 7.  | James Currington | At or above benchmark         | 205          | 550           | 0.37 | 0.29          | 1.3         |
| 8.  | Marlain Veal     | At or above benchmark         | 390          | 1,040         | 0.38 | 0.29          | 1.31        |
| 9.  | Eddy Polanco     | At or above benchmark         | 239          | 553           | 0.43 | 0.29          | 1.51        |
| 10. | Moses Greenwood  | At or above benchmark         | 310          | 651           | 0.48 | 0.29          | 1.67        |
| 11. | Jordan Capps     | At or above benchmark         | 410          | 636           | 0.64 | 0.29          | 2.26        |

Benchmark = NCAA P50 (0.2857 PPM), Compa ratio = Player PPM ÷ Benchmark, 1.0 = exactly at benchmark

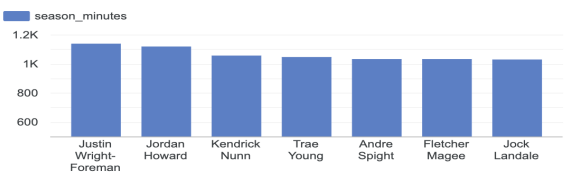

Top 15 Recruitment Targets - PPM Vs P75 Benchmark

Compa Ratio - Top 7 Targets

Minutes Played - Top 7 Targets

Approach Justification

- 1 Why P75 not P50?**  
P50 would recruit average replacements. P75 targets the top quartile.
- 2 Why target weak positions only?**  
lions\_weak\_positions CTE identifies gaps first. No point recruiting for positions where Lions already perform well.
- 3 Why 200-min minimum?**  
Small sample sizes create misleading PPM. 200 mins ensures statistical credibility and filters out single-game outliers.
- 4 Why Trae Young first?**  
0.79 PPM, 97% above P75 bar, 1,046 minutes of proven court time, Highest compa ratio on the shortlist at 1.97x.

Top 5 Priority Recruitment Targets

|    | Player        | Current Team       | PPM  | Benchmark P75 | Compa Ratio | Season Minutes |
|----|---------------|--------------------|------|---------------|-------------|----------------|
| 1. | Trae Young    | Oklahoma           | 0.79 | 0.4           | 1.97        | 1,046          |
| 2. | Tiwan Kendley | Morgan State       | 0.78 | 0.4           | 1.94        | 628            |
| 3. | Mike Daum     | South Dakota State | 0.76 | 0.4           | 1.89        | 965            |
| 4. | Roddy Peters  | Nicholls State     | 0.73 | 0.4           | 1.82        | 826            |
| 5. | Chris Clemons | Campbell           | 0.73 | 0.4           | 1.81        | 912            |
